SAEGUSA OXIDATION

(References are on page 667)

Importance:[Seminal Publications^{1,2}; Reviews³⁻⁷; Modifications & Improvements⁸⁻¹¹]Mechanism: ^{15,7}When substoichiometric/stoichiometric amounts of Pd(OAc)₂ is used:When the oxidation takes place under an oxygen atmosphere with catalytic amounts of Pd(OAc)₂:

a: R = CHO; d: R = CH(OCH₂)₂; e: R = CO₂Me; f: R = CN

Table 1. Conjugate Addition with Less Bulky Enones^a

entry	enone	conditions	yield	24:25
